

KRUUSE Fun-Flex Bones

Let's take it down to the bone with this flexible cohesive bandage in superior quality.

The bandage is perfect for fixating dressings and controlled support of sprains and distortions. The strong and easy-to-tear material is light and non-sticky which ensures user compliance and extra patient comfort.

164015	KRUUSE Fun-Flex Bones, 5 cm x 4.5 m, assorted, 2 of each pattern, 10/pk
164016	KRUUSE Fun-Flex Bones, 7.5 cm x 4.5 m, assorted, 2 of each pattern, 10/pk
164017	KRUUSE Fun-Flex Bones, 10 cm x 4.5 m, assorted, 2 of each pattern, 10/pk

Let's wrap it up!

Reliable and stable fixation

The high weight of the material, 35 g/m², makes the bandage strong and firm, yet comfortable. Provides excellent compression.

Easy to tear

No scissors needed! Simply pull in opposite directions to tear in a straight line.

Skin-friendly

KRUUSE Fun-Flex is coated with latex, which makes the bandage cohesive. It doesn't stick to surfaces like skin or hair and the porosity makes it breathable, hence it is skin-friendly.

Very flexible

KRUUSE Fun-Flex can be stretched to almost double the unrolled length! You can bandage all types of injuries on the animal's body and still control the compression.

Excellent elasticity

Spandex threads provide suitable shrinkage, which is necessary to give firm compression and fixation. With proper application the bandage will not constrict.

Easy to remove

The features of KRUUSE Fun-Flex cohesive bandages make them very easy to remove even without scissors.

Hygienic

The bandage is water-resistant, which helps prevent water from penetrating the layers. Each roll is individually wrapped in an easy-to-tear pouch.

Good patient and user compliance

The fact that the bandage is very light, does not constrict and is not sticky to touch makes it more comfortable for the animal and easy to work with for the vet and owner.

Easy to tear

Latex threads

Spandex threads

Recommended use for KRUUSE Fun-Flex

- Controlled support and compression of joints sprains and distortions
- Fixating dressings
- Secondary/tertiary bandage on top of a primary/secondary dressing

Application

1. Fixate the end of the bandage and apply evenly over the injured body part
2. Stretch the bandage according to the level of compression needed
3. When application is done, tear the bandage without twisting it
4. Gently squeeze the layers together to enhance the cohesiveness

Removal

- Unroll the bandage or cut gently with bandage scissors, being careful not to cut into the skin

Do not use

- If the patient or user is allergic to latex

For veterinary use only

Combine KRUUSE Fun-Flex Bones with BUSTER Design Collar Bones

- and make the perfect match
