KRUUSE Fun-Flex

Superior quality of flexible cohesive bandage for fixation of dressings and controlled support of sprains and distortions. Strong, comfortable and user-friendly. Easy to tear.

Unique features and benefits

Reliable and stable fixation

The high weight of the material, 35 g/m², makes the bandage strong and firm, yet comfortable. Gives good compression.

Easy to tear

No usage of scissor, as it is possible to tear in a straight line.

Skin friendly

KRUUSE Fun-Flex is coated with latex, which makes the cohesiveness stick to it-self, but not to other surfaces like skin or hair. The bandage is also porous for transition of air.

Very flexible

The KRUUSE Fun-Flex can be stretched to almost double the unrolled length; therefore it is possible to bandage all kind of injuries of the animal body and control the compression.

Very good elasticity

The bandage has spandex threads, which gives a suitable shrinkage, that is necessary to give a firm compression and fixation. Will not constrict unless wrongly applied.

Easy to remove

The features of the KRUUSE Fun-Flex cohesive bandage make the bandage very easy to remove even without a scissor.

Hygienic

Water resistant, excellent to keep bandage dry from the outside. Each roll is wrapped individually in an easy to tear pouch.

Good compliance from the patient

The bandage is very light, does not constrict and is not sticky to touch.

Easy to tear

Latex threads

Spandex threads

Recommended use for KRUUSE Fun-Flex

- Controlled support and compression of joints, sprains, distortions
- Fixating dressings

Instructions for use

Application

Fixate the end of the bandage and apply evenly over a larger area of the injured body part stretching the bandage according to the level of compression needed. When application is done, do a straight tear of the bandage.... Do not twist; it will make the tearing more difficult. When applied, squeeze gently the layers together to enhance the cohesiveness. Use KRUUSE Fun-Flex as secondary/tertiary bandage on top of primary/secondary dressing.

Removal

Unroll bandage or cut gently with a bandage scissor, be careful not to cut into the skin.

Do not use

If patient or user is allergic to latex.

For veterinary use only
