

## KRUUSE Silk

**Multifilament, braided:** For secure knot tying and easy handling

**Coated (wax):** For easy knot tying and smooth passage through tissue

**Non-absorbable:** Provides permanent tensile strength

KRUUSE Silk is a natural, braided and coated suture. As silk is a natural fiber, more tissue reaction can be expected using this type of suture compared to synthetic sutures.

Natural silk contains two glycoproteins: Fibroin and sericin. Sericin can cause an immune response and is removed from KRUUSE Silk.

**Absorption:**

- Non-absorbable

**Chemical composition:**

- KRUUSE Silk is composed of 100% fibroin (Sericin, which can cause an immune response, is removed)

**Colour:**

- Black

**Indications:**

KRUUSE Silk sutures are indicated for soft tissue approximation and ligation, where permanent support is indicated, including:

- Ophthalmic surgery
- Vascular and cardiovascular surgery
- Neurosurgery
- Dental surgery
- Ligation

**Contraindications:**

- Where a minimum of tissue reaction/foreign body reaction is required

**Range:**

- USP 4-0 to 0
- EP 1.5 to 3.5

**Sterilization method:**

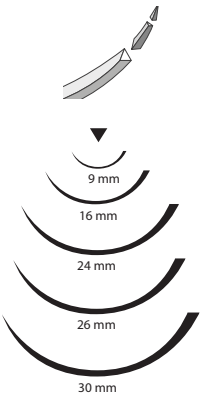

- EO

**Packing:**

- Boxes of 18 peel packs
- Cassettes
